INDEX OF ABSTRACTS

Volume 1 (1980)

ABDELKADER, Mostafa A. Exact solutions for a non-Newtonian fluid, nonlinear differential equation, 173; Exact solutions for a predator-prey model with immigration of predators, 231; Exact solutions for equations of nonlinear progressive wave profiles, 342; Exact solutions for nonlinear differential equations of area-fire warfare models, 384; Exact solutions for the nonlinear differential equations of a macrocombat model, 490; Exact solutions for $x'' + (ax + b)x' + cx(x + h) = 0$, 580.

ABELES, Francine F. Doubly proportional representation. Preliminary report, 299.

ABHYANKAR, Shreeram and RUBEL, Lee A. Every difference polynomial has a connected zero-set, 568.

ABIAN, Alexander. The precise maximum and minimum moduli of zeros of polynomials, 377; Some nonnegative determinants in inner product spaces, 408; Newton's law of gravitation, Kepler's third law and the period of a simple pendulum, 581.

ABIAN, Alexander and JOHNSTON, Elgin H. Zeros of partial sums of the Laurent series of analytic functions, 227.

ABIAN, Alexander, HOGBEN, Leslie and JOHNSTON, Elgin H. Laurent series obtained by long division, 229.

ABIKOFF, William. b-function groups and formally Kleinian groups, 543.

ABLOWITZ, Mark J. On a nonlinear singular integro-differential equation. Preliminary report, 510.

ABRHAM, Jaromir. Bounds for the sizes of components in perfect systems of difference sets, 563.

ABRHAM, Jaromir and KOTZIG, Anton. Bases of additive permutations with a given number of odd elements, 563; Generalized additive permutations of cardinality six, 619.

ABRAMOVICH, Shoshana and STRELITZ, Shlomo. On the existence of eigenvalues and bounded solutions of differential systems dependent on a parameter. Preliminary report, 434.

ABRAMSON, Fred G. Recursion theoretic principles in admissible sets, 548.

ABU-KHUZAM, Hazar. A commutativity theorem, 419.

ABU-KHUZAM, Hazar and YAQUB, Adil. A commutativity theorem for n-torsion free rings, 41.

ABU-KHUZAM, Hazar, TOMINAGA, Hisao and YAQUB, Adil. Equational definability of addition in rings, 317.

ACCOLA, Robert D. M. On elliptic-hyperelliptic Riemann surfaces of genus six, 342.

ACKER, Andrew F. An inequality involving the flow of current through distributed resistance. Preliminary report, 225; An extremal problem involving current flow through distributed resistance, 340; An isoperimetric inequality involving heat flow in the time-varying case. Preliminary report, 481; A free boundary optimization problem involving torsional rigidity. Preliminary report, 571.

ADAMS, David R. LP-integrability of solutions to obstacle problems. Preliminary report, 66.

ADAMS, M. E. and SICHLER, J. Lattices with unique complementation, 477; Automorphisms of poset and lattice extensions, 555.

ADAMS, M. E., PIGOZZI, D. and SICHLER, J. Endomorphisms of direct unions of bounded lattices, 477.

ADOMIAN, G. Nonlinear stochastic system theory, 455.

ADOMIAN, G. and MALAKIAN, K. Rapid computation of statistical measures of approximate solutions of stochastic systems, 148.

AHARONI, Israel, MAUREY, Bernard and MITYAGIN, Boris S. Positive-definite functions and uniform embeddings of Banach spaces into Hilberts spaces, 103.

AHSAN, J. and ISMAIL, M. On semisimple linearly compact rings. Preliminary report, 363.

AHUJA, O. P. See MOGRA, M. L.

AHUJA, O. P. and MOGRA, M. L. On certain classes of close-to-convex and close-to-star functions. Preliminary report, 379.

AKEMANN, Charles A. See LEE, Tan-Yu.

AKIN, Kaan. Characteristic-free resolutions of determinantal ideals. Preliminary report, 538.

AKRITAS, Alkiviadis G. On the Budan-Fourier controversy, 443.

AL-AMIRI, H. S. and MOCANU, Petru. Spirallike nonanalytic functions, 60; Certain sufficient conditions for univalency of the class C', 429.

ALAS, O. T. An inequality with topological cardinal invariants, 397.

AL-DAFFA., Ali A. Al-Biruni's proof of Heron's formula, 401; Development of right triangle. Preliminary report, 531.

ALEX, Leo J. A characterization of the simple group L(3,5), 508.

ALEXANDER, H. Uniform semigroups, Jensen measure and capacity. Preliminary report, 516.

ALEXANDER, Ralph. Problems related to the theorems of Kirszbraun and Valentine. Preliminary report, 330.

ALEXANDER, Ralph, BISHOP, Richard L. and WETZEL, John E. Two-coloring Euclidean two-arrangements and factoring a reversal. Preliminary report, 451.

ALEXANDER, Roger K. A nonlinear differential equation from combustion theory. Preliminary report, 519; A discontinuous nonlinear eigenvalue problem involving a free boundary, 608.

ALEXANDERSON, G. L. and WETZEL, John E. Some inequalities for arrangements in three-space, 329.

ALFARO, Manuel. See MARCELLAN, Francisco.

ALI, Mir Masoom. See FORST, Frederick R.

ALIPRANTIS, C. D. and BURKINSHAW, O. Comparing locally solid topologies, 99.

ALLADI, Krishnaswami. The Erdos-Kac theorem for the sieve of Eratosthenes, 411; The Moebius function and integers with restricted prime factors, 602.

ALLARD, William K. The structure of the family of minimal submanifolds of a sphere and its relation to the singularities of minimal surfaces, 113.

ALLAWAY, William R. and ISMAIL, M.E.H. The Eulerian umbral algebra, 285.

ALLAWAY, William R. and YUEN, K. W. Ring isomorphisms for the family of Eulerian differential operators, 71.

ALLEN, G. D. Locally continuous operators, 449.

ALLEN, P. J. and HOBBY, C. A characterization of units in $Z[A_4]$, 48.

ALLEN, Robert B., HEDETNIEMI, Stephen and LASKAR, Renu. On the total domination number of graphs, 16.

ALLENBY, R. B. J. T. and TANG, F. C. Y. Some new classes of residually finite one-relator groups with torsion, 282; Some residually finite 1-relator groups, 538.

ALLINGER, Deborah F. Causal solutions for stochastic differential equations. Preliminary report, 497.

ALLINGER, Deborah F. and MITTER, Sanjoy K. New results on the innovation problem. Preliminary report, 241.

ALMGREN, Fred J., Jr. Multiple valued functions minimizing Dirichlet's integral and the regularity of mass minimizing integral currents. Preliminary report, 114.

ALMGREN, Fred J., Jr. and SOLOMON, B. How to connect minimal surfaces by bridges. Preliminary report, 255.

ALO, Richard A. and de KORVIN, Andre. Some topological considerations for Hammerstein operators on LP spaces. Preliminary report, 58.

ALON, Noga. On the number of certain subgraphs of graphs with a given number of edges, 213.

ALPERIN, Roger. Locally compact groups acting on trees, 537.

ALPERN, Steve. Generic properties of homeomorphisms preserving a finite or infinite measure, 59.

ALPSEYMEN, Mefharet. Basic sequences in nuclear stable $L_F(b,r)$-spaces, $0 > r > \infty$, 445.
ALSPACH, Dale E. A division problem for C(K) spaces. Preliminary report, 96.
ALT, H. W. and CAFFARELLI, Luis A. A free boundary flow problem. Preliminary report, 261.
ALTMAN, M. Iterative methods of contractor directions, 109; A general ordering principle in functional analysis, 170.
AMAYO, Ralph. Residually central Lie algebras, 202.
AMBOS-SPIES, Klaus. On pairs of recursively enumerable degrees, 545.
ANACKER, Steven E. Sequenced k-coloring. Preliminary report, 8; Reconstructable partitions and separable graphs. Preliminary report, 181; Reconstructable partitions and separable graphs. II. Preliminary report, 566.
ANCEL, Fredric D. Countable dimensionality and cell-like maps. Preliminary report, 204.
ANDERSEN, K. F. and KERMAN, R. A. Weighted norm inequalities for generalized Hankel transformations, 171.
ANDERSEN, L. D., HAGGKVIST, R., HILTON, A. J. W. and POUCHER, W. B. Embedding incomplete latin square in latin squares whose diagonal is almost completely prescribed, 8.
ANDERSON, Bruce A. and LEONARD, Philip A. Some Howell designs of prime side II. Preliminary report, 14.
ANDERSON, David F. The Picard group of a graded domain, 601.
ANDERSON, David H. The natural resonance of a population renewal model. Preliminary report, 160.
ANDERSON, E. H. and ANDERSON, M. J. The equivalence of the uncountably many closed sets property and the least upper bound property of the real numbers, 423.
ANDERSON, James A. A few comments on parallel, distributed, associative neural models, 523.
ANDERSON, Larry and DUCICH, Sarah. A two parameter family of Liapunov functions for a class of Lienard equations, 354.
ANDERSON, M. J. See ANDERSON, E. H.
ANDERSON, Marlow E. and EDWARDS, Constance C. Lattice ordered semigroups. Preliminary report, 51.
ANDERSON, Mary F. The growth of pivots during Gaussian elimination with complete pivoting, 366.
ANDERSON, Michael P. Some examples of complex tori. Preliminary report, 516.
ANDERSON, Robert M. Almost implies near. Preliminary report, 3.
ANDERSON, Ronald M. and FORD, Wayne T. Some properties of solutions of similarity porous media systems, 75.
ANDERSON, Stephen. Bounded point evaluations and Jensen measures. Preliminary report, 170; Bounded point evaluations and Jensen measures. Preliminary report, 229.
ANDRÉKA, Hajnal and NÉMETI, István. On problems in cylindric algebra theory, 588.
ANDREW, Alfred D. and GREEN, William L. The automorphism group of James. quasi-reflexive Banach space, 98.
ANDREW, Alfred D. Spreading basic sequences and spreading models of James. quasireflexive space, 230; James. quasireflexive space is not isomorphic to any subspace of its dual, 485.
ANDREWS, George E. Theta series expansions in Ramanujan's "lost" notebook, 279; Totally symmetric plane partitions, 415.
ANDREWS, Kevin T. and UHL, J. J., Jr. Weak compactness in $L_\infty(\mu,X)$, 98.
ANELLIS, Irving H. Integer-representability of Gödel incompleteness, 198; A new proof for the strong version of the Löwenheim-Skolem Theorem, 206; Proof-theoretic Godel incompleteness for z*, 389.
ANGAD-GAUR, Hendrik. On the global dimension of semigroup rings. Preliminary report, 50.
ANSTEE, Richard P. Properties of (0,1)-matrices with no triangles, 11.
ANTHONY, J. M. and SHERWOOD, H. The structure of fuzzy subgroups, 48; What can be done with fuzzy subgroups?, 48.
ANTMAN, Stuart S. and KENNEY, Charles S. Global bifurcation and stability of compressed and twisted rods, 298.
APIOLA, Heikki. Every nuclear Frechet space is a quotient of a Schwartz $L_F(\alpha,\infty)$-space, 287.
APPLING, William D. L. Absolute continuity and logarithmic and integration-by-parts operators, 57; Reversible subsets of certain linear transformations, 375.
ARAZY, Jonathan. Basic sequences, embeddings, and the uniqueness of the symmetric structure in unitary matrix spaces. Preliminary report, 104.
ARCHDEACON, Dan S. A Kuratowski theorem for the projective plane, 9.
ARENSTORF, R. F. Distribution of integral points on ellipsoids. Preliminary report, 603.
ARKIN, Joseph, HOGGATT, V. E., Jr. and STRAUS, E. G. On a problem of Diophantus II, 25; Diophantus I and II, 412.
ARLINGHAUS, William C. Non-graphical Klein and Klein-like groups, 12.
ARMSTRONG, Thomas E. and PRIKRY, Karel. Liapounoff's theorem for finitely additive measures, 423.
ARNOLD, J. T. Power series rings over Krull domains. Preliminary report, 602.
ARNOLD, J. T. and BOISEN, M. B., Jr. Simple going down and going down. Preliminary report, 32.
ARNON, Jonathan D. The special representation of Chevalley groups over $\mathbb{F}_q((t))$. Preliminary report, 52.
AROCENA, Rodrigo, COTLAR, Mischa and SADOSKY, Cora. Weak weighted continuity in L^2, Carleson measures and BMO, 172.
ARSOVE, Maynard and LEUTWILER, Heinz. Mixed lattice structures, 18; A unified theory of harmonic measures and capacitary potentials, 293.
ARTHANARI, M. Prime ideals and primary decomposition in triple system. Preliminary report, 210.
ASH, Avner. New newforms for GL(3). Preliminary report, 357; Search for motives for GL(3)-automorphic forms. Preliminary report, 507.
ASIMOV, Daniel and GLUCK, Herman. Geodesible Morse-Smale flows. Preliminary report, 139.
ASIMOV, Dan, GOODMAN, Sue and SCHWEITZER, Paul. Stable nonsingular flows not transverse to any foliation, 139.
ASKEY, Richard. Some historical remarks on orthogonal polynomials, 68; Sums and integrals related to orthogonal polynomials in one and more dimensions. Preliminary report, 431.
ASSMUS, E. F., Jr. Homogeneous Steiner systems of type $3\text{-}(v,\{4,6\},1)$, 405.
ATKIN, A. O. L. and RICKERT, N. W. Some factors of Fermat numbers. Preliminary report, 211.
ATKINSON, Bruce W. The commutativity of projections with respect to a Markov process, 142.
ATKINSON, F. V. and FULTON, C. T. Asymptotic formulae for eigenvalues of limit circle problems. Preliminary report, 77.
ATHANASOPOULOS, Ioannis. Regularity of the solution of an evolution problem with inequalities on the boundary. Preliminary report, 608.
AUBERT, J. and SCHNEIDER, B. Decomposition de $K_m + K_n$ en cycles Hamiltoniens, 362; Décomposition de la somme cartésienne d'un cycle et de l'union de deux cycles Hamiltoniens en cycles Hamiltoniens, 472.
AUER, J. W. Densities on smooth bundles, 525.
AULL, Charles E. Absolute z-embedding in functionally Hausdorff spaces. Preliminary report, 452; Various types of embeddings. Preliminary report, 613.
AUPETIT, Bernard. Analytic multivalued functions applied to uniform algebras. Preliminary report, 513.
AUSLANDER, Louis. Hecke's quadratic reciprocity theorem and analysis on nilmanifolds, 184.
AUSLANDER, Louis, TOLIMIERI, R. and WINOGRAD, S. Hecke's theorem on quadratic reciprocity, finite nilpotent groups and the FFT, 506; A nilpotent group view of Gauss sums. Preliminary report, 517.
AUSLANDER, Maurice and SMALO, Sverre. Generaliza-

tions of invariant factor decomposition of finite abelian groups, 254.
AVRUNIN, George S. Annihilators of cohomology modules, 421.
AZAD, K. K. On fuzzy semicontinuity, fuzzy almost continuity and fuzzy weakly continuity, 594.
AŽIGANIČ, T. The number of conjugacy classes of the group $T_n(P)$ contained in $UT_n(P)$, 565.
AZUMAYA, Goro. Exact and serial rings, 508.
AZZAM, Ali and KREYSZIG, Erwin. A class of kernels of Bergman operators for equations in two variables, 170; Transformation of the partial differential equation for Bergman kernels, 220; On the Hölder continuity of solutions of parabolic equations near edges, 341; Solutions of certain equations in terms of finitely many Bessel functions, 573.

BACHMUTH, S. See MOCHIZUKI, Horace Y.
BACHMUTH, S. and MOCHIZUKI, H. SL_2 of Laurent polynomial rings, 48; SL_2 of Laurent polynomial rings and automorphisms of solvable groups, 278.
BACIU, Aurora and PASCU, Anca. Leontief languages, models of input-output systems, 460.
BACK, Allen. Pontryagin forms on homogeneous spaces, 119; Equivariant geometry of circle actions on three manifolds. Preliminary report, 525.
